

## The RFID Specialists

CoreRFID is a specialist in the technologies that track, trace, audit and control. We help our clients to develop, implement and benefit from systems that use these technologies. CoreRFID supplies hardware, software and services that support radio frequency identification (RFID) and barcode applications. CoreRFID provides tags, readers, hand-held devices and other components.

Systems and components for RFID applications can be bought from the CoreRFID on-line shop at [www.rfidshop.com](http://www.rfidshop.com).

## Our Experience

CoreRFID has long experience in the technologies that support track, trace, audit and control applications.

While RFID is still a relatively new technology, CoreRFID has a track record in working successfully with the full range of devices, software and solutions used for track, trace, audit and control applications. This means CoreRFID can help you to make the best choices for your RFID system requirements.

Technology provided by CoreRFID is used to support applications in areas as diverse as:

- Asset Management
- Animal Tracking
- Vehicle / Tool Usage Control
- Logistics & Delivery Tracking
- Health & Safety Management
- Security & Access Control

CoreRFID has helped organisations like the BBC, Capita, Nokia, Thames Water and Norwich Union by providing the technologies to meet their needs.

## Customers & Solutions

CoreRFID works with over 1100 customers across the UK, Europe, the USA and the rest of the world, providing them with the systems and support they need for their applications.

Many customers have continued to do business with CoreRFID over a number of years. Users of CoreRFID solutions are found in finance, broadcasting, construction, defence, government and telecommunications. Customers include the BBC, Capita, Nokia, BAA, Thames Water, the Channel Tunnel, Norwich Union, Galliford Morgan and Amec.

CoreRFID specialises in the complete range of technologies for track, trace, audit and control applications, assisting customers to make the right choices for business critical applications. CoreRFID provides:

- RFID tags, sourced worldwide or custom manufactured
- Tag reader / scanner devices.
- Tag Printers
- Design and development of RFID software.
- Hand held computers
- Training and implementation.

CoreRFID software solutions include systems for maintenance management, room asset management, and despatch quality control. CoreRFID provides custom tag development services and also specialises in the encoding and decoding techniques needed to make best use of the limited storage space available on RFID tags.

## Experts In Track, Trace, Audit & Control

In a field where new development makes new applications practical, CoreRFID keeps in touch with the latest advances and makes it easy for our clients to get the benefit of them.

CoreRFID works with leading suppliers of RFID technology and implements software solutions that make it quick and easy to introduce RFID technology within your business. These solutions are developed using the Microsoft .Net Framework making it easy to integrate track, trace audit and control applications with other back office systems.

CoreRFID has strategic partnerships with providers of Ultra High Frequency components and other RFID technologies, making it possible for CoreRFID's clients to exploit this technology.

## Our Organisation

CoreRFID Ltd has established a reputation in the global RFID industry for delivering innovative products and services that help its customers to deliver successful solutions. With bases in the US, UK and Europe, CoreRFID is now working on some of the most advanced RFID projects, delivering RFID based systems, often in short timescales. The business invests in products and in its staff and enjoys the strength provided by profitable growth, loyal customers and an experienced team.

CoreRFID was formerly known as Mannings RFID, part of the Mannings engineering group. In July 2007 the Mannings RFID team successfully completed a management to create a business exclusively focused on the needs of RFID technology users. CoreRFID retains all the staff, know-how and intellectual property of the Mannings RFID business. The CoreRFID team of experienced engineers and its sales and administration centre is based in Warrington, in the North West of England. CoreRFID has been recognised under the Investors in People programme. CoreRFID is a member of GS1 and AIM UK.

CoreRFID is backed by Enterprise Ventures and NatWest Bank.

INVESTOR IN PEOPLE
