News from CoreRFID #17

Health & Safety Expo, Emotional Museum, Mifare Plus

More RFID News from CoreRFID.

This month we bring you some news about the Safety & Health Expo,a new CoreRFID case study and the security improvements from Mifare Plus.

The Health & Safety Expo is a chance to see some of the latest advances in technology intended to help business improve safety at work and to make conforming with legislation easier. CoreRFID will be there.

Emotional Value have developed an innovative approach to enabling visitor interaction at museums. Dubbed the Emotional Museum, their solutions uses RFID technology from CoreRFID.

Mifare Plus is solving the problems of applications needing more secure RFID technology.

Safety & Health Expo : Birmingham NEC : May 11th to 13th

Safety & Health Expo is Europe's largest annual event for the industry. This year it will unites thousands of key health and safety professionals with more than 300 leading manufacturers, distributors and suppliers and, of course, we are there.

CoreRFID will be showing ChekedOK our latest solution for health and safety. CheckedOK is a system that builds on our experience with some of the UK's leading companies. It provides RFID, barcode and visual label based ways of checking assets for safety. See us on stand J85, close to the AIF Forum area.

The 2010 Safety & Health Expo event is set to be bigger and better than ever before with exciting new features and more than 90 hours of topical, free, seminars giving you the chance to keep up to date with all the pertinent issues on the health and safety agenda, source the latest innovations and share best practice with your peers.

There's no better place to discover how to remain compliant, reduce risk and manage costs

Safety & Health Expo is co-located with The Facilities Show and IFSEC 2010.

CoreRFID Safety & Health Solutions

Putting The Emotion Into Museum Visiting

RFID is widely used to help provide interaction between museum visitors and the exhibits they have come to see. Latest example of this is the Emotional Museum, a solution created by interactivity innovators, Emotional Value. CoreRFID provided the technology.

More details on Emotional Value here

or learn about our other Museums & Leisure projects.

Emotional Value is just one of the many software and solution developers that CoreRFID helps by providing the auto-id component of their solution.

We are always happy to discuss how our technologies and capabilities can be used to extend the potential of existing software solutions.

Check out the Emotional Value case study or contact us for a discussion on how we can help you.

Security Improvements With Mifare Plus

If your RFID application needs to be able to securely identify an individual but NXP's Mifare Classic doesn't offer a high enough standard of security then Mifare Plus may be the answer.

With 128bit AES encryption (compared with Mifare Classic's 48bit CRYPT01 system), now there's Mifare Plus. The Mifare Plus tag offers an upgrade path for Mifare users concerned about limitations in the original, proprietary, encryption system and also provides the ideal platform for future stored-value applications, such as travel cards.

You see a short comparison of the features of Mifare Classic, Mifare Plus and Mifare Plus X (the latest variant on offer from CoreRFID) at our web site and you can order Mifare Plus tags through our on-line shop.
