**November 21st 2008
For Immediate Release**

Sales Director Joins The CoreRFID Team

CoreRFID has strengthened its sales team with the appointment of Mike Maughan as Sales Director to lead the expansion planned for the business.

Mike joins the team bringing with him over twenty years of sales experience in technology markets. He has a track record in channel development, especially in support of enterprise solutions for blue-chip organisations. Mike's background includes channel and business development for the Sun Microsystems and Fujitsu Siemens partner networks.

"We are delighted that Mike has joined us," said CoreRFID Managing Director, Jim Ryder. "With demand for RFID in our focus areas remaining strong despite the recession, we continue to identify new opportunities. Mike will help us to develop those opportunities in both our direct sales and our partner business."

Notes for Editors

About CoreRFID Ltd.

Over the last 15 years CoreRFID Ltd has established a prominent reputation in the global RFID industry for delivering innovative products and services that help its customers to deliver successful solutions.

With bases in the US, UK and Europe, CoreRFID is now working on some of the most advanced RFID projects, delivering RFID technologies often in short timescales. CoreRFID customers include the BBC, Capita, Nokia, BAA, Thames Water, the Channel Tunnel, Norwich Union, Galliford Morgan and Amec.

CoreRFID was formerly known as Mannings RFID, part of the Mannings engineering group. In July 2007 the Mannings RFID management team successfully completed a management buyout from Mannings UK to create a business exclusively focused on the needs of RFID technology users. CoreRFID retains all the staff, know-how and intellectual property of the Mannings RFID business. The CoreRFID team of experienced engineers and its sales and administration centre is based in Warrington, in the North West of England.

CoreRFID is backed by Enterprise Ventures and NatWest Bank.

About the use of RFID

Radio frequency identification is widely used to help track, trace audit and control items by allowing computer systems to read details of tags attached to stock, assets or other items. RFID is used for applications such as:

- Keeping track of stock as it moves from manufacturer to warehouse to shipping agent to retail outlet to customer.
- Providing travellers with tickets that register each journey as it is made.
- Identifying livestock to ensure traceability of food, to prevent theft or to help lost animals to be reunited with their owners.
- Providing access control and checking who enters premises and when.

The wide range of different types of tags with widely different data handling capabilities and reading characteristics means users of RFID systems need to make careful technology choices to create successful applications. CoreRFID specialises in helping customers to make these choices.
