

GS1100 GuardScan® Guard Patrol Tour Terminal

Introduction:

GUARDSCAN is a Patrol Tour Data Collection Terminal based on RFID technology. It is so-called “**GUARDSCAN**” because its function is to scan RFID tags and store their ID-codes in a journal memory, together with the Date/Time stamp. It helps you watch over your employees that have had difficulties to track those whose working duties require moving from place to place, such as security personnel patrolling, policeman patrolling, remote equipment inspection/maintenance... etc. Now thanks to the “**GUARDSCAN**”, you can verify what jobs your personnel have done throughout the working shift.

Features:

- One-touch operation
- Journal memory: 14,320 records
- Use AA size battery, replaceable and easy to get replacement
- RS-232 interface or USB
- Wide operating temperature: - 10 to 55 Deg. C
- Up to 50,000 reading scan on a full heavy-duty battery

Applications:

- Security personnel patrolling
- Policeman patrolling
- Military patrolling
- Building guard patrolling
- Community guard patrolling
- Remote equipment inspections/maintenance
- Goods delivery, transportation management

Value-added bundled software:

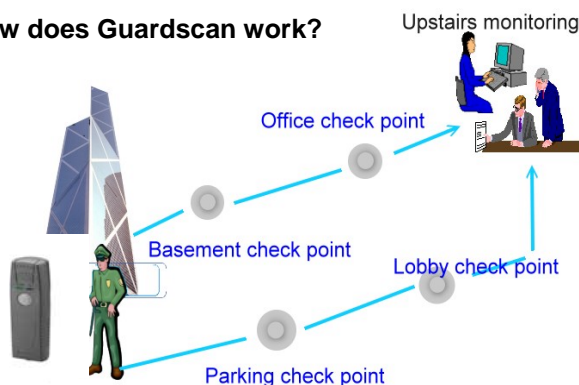

To use the computer, you may purchase the optional application software “**Patrol Manager**” to set your patrol management system and make the Report as below.
