

Lifting Industry Specialist

CoreRFID is a solution integrator & technology supplier.

For 10 years, CoreRFID has been creating solutions for the lifting industry world-wide, helping to improve safety and efficiency.

CoreRFID delivers systems to end-users, inspecting engineers, maintainers, hire companies and manufacturers of lifting gear and equipment suppliers

Inspection Solution

CoreRFID's CheckedOK is the leading lifting inspection system. Supplied worldwide, it has created more than 14 million inspection certificates for lifting equipment & gear.

Proof Test & Load Monitoring

CoreRFID developed the HHP & PTP software for Straightpoint's wireless controlled loadcells used across seven continents for remote checking of loadings from mobile devices.

Accurate Deliveries

Ainscough Crane Hire used CoreRFID to deliver a system to get the right configuration of luffers, jibs and lifting gear picked from the yard and delivered to site

Lifting Control

Hyster's fork lift truck control and driver assistance system uses CoreRFID supplied technology in their global solution.

Our Expertise:-

- Delivering, operating and managing complete solutions for lifting safety inspection worldwide
- Expertise in LOLER, PUWER, and COPSUL regulations to manage safety on lifting gear, equipment and personal work equipment as well as in height safety, pressure systems and calibration.
- Working with lifting clients using fixed and mobile cranes, forklifts, hoists.
- Experience in UK, Eire, & international regulatory areas.
- Capability in “Internet of Things” technologies for asset management and hire.
- LEEA membership keeps us in touch with new standards.
